Let's Sign BSL Science Vocabulary

Graphic Index

There are 721 graphic files contained in the Science graphics set in line and colour versions.

BSL signs do not have single English word equivalents and frequently have a number of meanings in different contexts, just as English words may also have numerous meanings.

Rather than provide a list of contents of graphics with a single file name, we have included this pdf containing the Index of contents from our book publication *Let's Sign Science BSL*

Vocabulary for Key Stage 1, 2 & 3 to give a more realistic representation of the concepts included.

This Index contains 1,360 words that are likely to be used when searching and refer to the page in the book with the graphic image that represents the concept needed.

The book provides a complete reference of the signs that are within the Science graphics pack and is recommended to be used alongside the pack.
