Reducing means creating less waste.

We can do this by creating fewer new things.

This means we use less energy and materials.

This means we produce less pollution.

Creating

fewer

new things

is better

for the environment.

Using

too many

materials

produces

waste.

Using

too much

energy

produces

pollution.

Pollution

is bad

for the environment.

 Try to buy items that can be recycled.

 Try to buy items that are durable.

 Durable items last a long time.

 This means we need to buy fewer new items.

Try to buy non toxic products.

Non toxic products use less energy.

Non toxic products produce less pollution.

Non toxic products are better for the environment.

Many

power stations

burn

fossil fuels

to generate

electricity.

=

Fossil fuels are a source of energy.

Power stations

use

a lot

of energy.

Using

too much

energy

is bad

for the environment.

It is important to try to save energy.

Saving energy produces less pollution.

This is good for the air, water and land.

Saving energy means we will have more energy for the future.

Tips for Reducing

-   lights when  you are  not using them.

-   central heating when  not  at home.

-  Keep windows  closed when  it is cold  outside.

-  Showers  use less  water and  electricity than  baths.

- 

 Walk or cycle instead of driving.

- 

 Use public transport instead of a car.

- 

 Close doors to keep the warmth inside.

- 

 Reuse plastic bags and don't buy new ones.

- 

 • Heat food in a microwave instead of an oven.

- 

 • Hang clothes to dry instead of using a dryer.

- 

 • Only boil the level of water that is needed.

- 

 • Unplug electrical items when not in use.

- Use energy efficient light bulbs.

- Open curtains to let warmth inside on a hot day.

- Keep the fridge door closed.

- Turn off taps whilst brushing your teeth.
