

Roosters

Roosters are a species of bird.

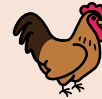

A rooster is a male chicken.

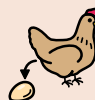

Roosters have bright, colourful feathers.

Roosters have a comb on their heads.

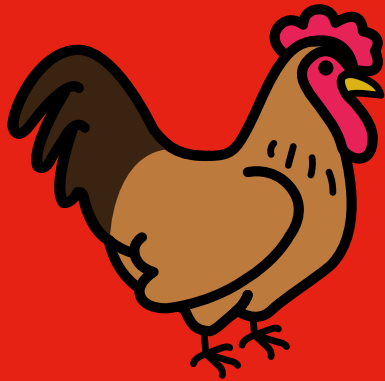

The comb helps keep them cool.

Roosters don't lay eggs.

Roosters

Roosters can only fly short distances.

Roosters mainly hop or flutter onto low branches.

Roosters are noisy birds!

Roosters crow at sunrise and sometimes during the day.

Roosters are brave and protective birds.

Roosters eat grain, insects, worms, vegetables and fruit.
