The rainforest has many different plants.

Some plants are very old.

The trees grow very tall.

They grow to reach the sunlight.

The trees need very big roots.

The roots stop the trees falling over.

Some of the trees are very strange.

Vines grow around the trunks to reach sunlight.

This seed pod is from a very old tree.

The seed pod is very big.

The seeds of another tree grow on its trunk.

The seeds hang like baubles.

These are roots that grow above the ground.

The trees are called walking trees.

Some plants are very rare.

These fan palms are found in only a few places.

Some plants have flowers.

Some flowers are very bright colours.

Fungus is very important in the rainforest.

Fungus and mushrooms grow in many shapes and sizes.

Animals are also important.

Some animals are hard to see.

Here is a wallaby hiding in the rainforest.

Some rainforest are very big.

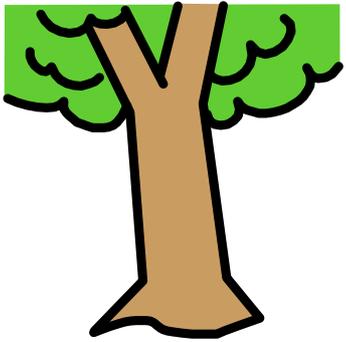

They can grow from the mountain to the sea.
