

Antarctica

Widgit Symbols (c) Widgit Software 2005

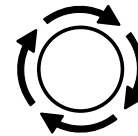

Antarctica

is the

continent

surrounding

the

South Pole.

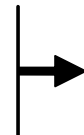

Boats

go to

Antarctica

from

New Zealand

and

South America.

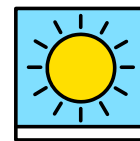

It

takes

10

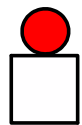

10

days

to get there.

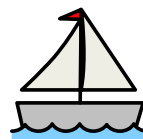

On

the

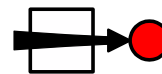

way

the

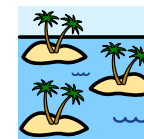

boat

passes

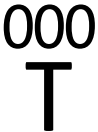

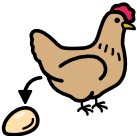

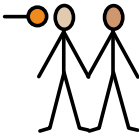

some

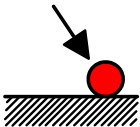

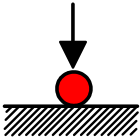

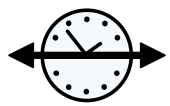

islands.

 Thousands of penguins and albatrosses

 come ashore to lay their eggs.

 =  +   !!
There are sea-lions and seals here too.

During

the

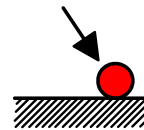

summer

in

Antarctica

there is

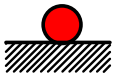

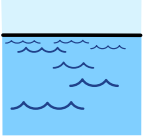

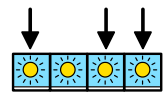

no

night.

 It is  very  cold  and the  sea is  often  frozen.

The  only  people  living  here  are  scientists.

Penguins

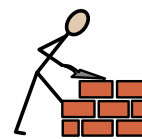

use

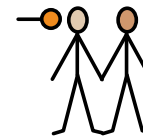

stones

to

build

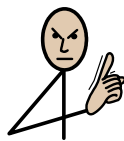

their

nests.

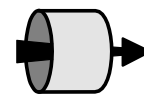

Boats

have to

break

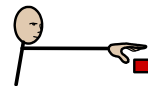

through

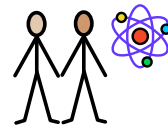

the ice

to

reach

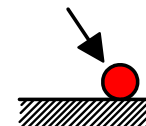

the

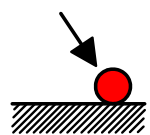

scientists

living

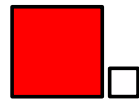

there.

There

=

are

large

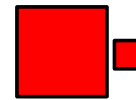

icebergs

2x

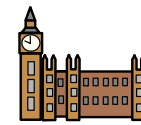

twice

the

size

of

London.
