256Mb RAM min, preferably 512MB or above and Sound Card

1GB hard disk space.

Minimum resolution of 1024x768.

Supports widescreen resolutions.

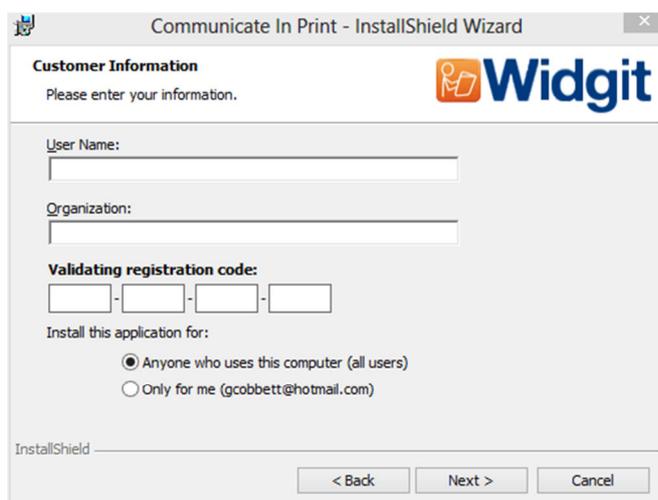

Before Installing

Make sure you are an administrator for the computer

You need administrative privileges to install new software. Almost all home users are administrators of their computer by default, but on a school network you may need to ask your technician to install software for you.

Installing

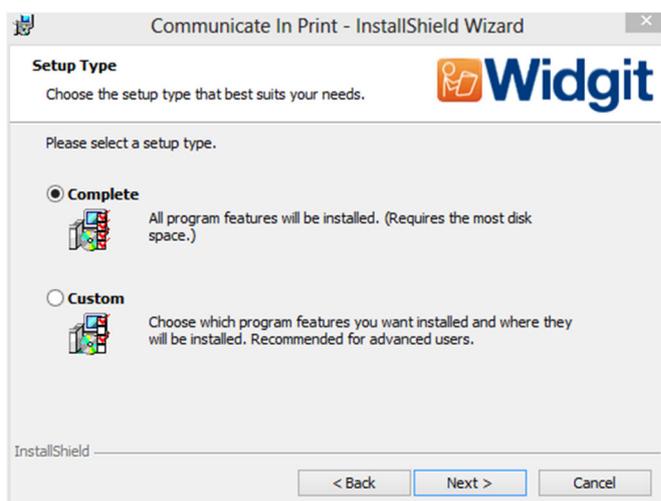

The screenshot shows the 'Customer Information' step of the 'Communicate In Print - InstallShield Wizard'. The window title is 'Communicate In Print - InstallShield Wizard'. The main heading is 'Customer Information' with the instruction 'Please enter your information.' and the 'Widgit' logo. There are three input fields: 'User Name:', 'Organization:', and 'Validating registration code:'. Below these is a section 'Install this application for:' with two radio button options: 'Anyone who uses this computer (all users)' (selected) and 'Only for me (gcobbett@hotmail.com)'. At the bottom are buttons for '< Back', 'Next >', and 'Cancel'.

When you insert the CD, the installation process should begin automatically. If it does not, browse to the CD and double click the '**Communicate In Print 2.msi**' file.

Click '**Next**' to continue.

Enter your details. Your registration code can be found printed on your licence agreement which is located inside the dvd case.

Note: The registration code must be entered in lower case.

The screenshot shows the 'Setup Type' step of the 'Communicate In Print - InstallShield Wizard'. The window title is 'Communicate In Print - InstallShield Wizard'. The main heading is 'Setup Type' with the instruction 'Choose the setup type that best suits your needs.' and the 'Widgit' logo. There are two radio button options: 'Complete' (selected) and 'Custom'. The 'Complete' option has a description: 'All program features will be installed. (Requires the most disk space.)'. The 'Custom' option has a description: 'Choose which program features you want installed and where they will be installed. Recommended for advanced users.' At the bottom are buttons for '< Back', 'Next >', and 'Cancel'.

You will be asked which type of setup best suits your needs:

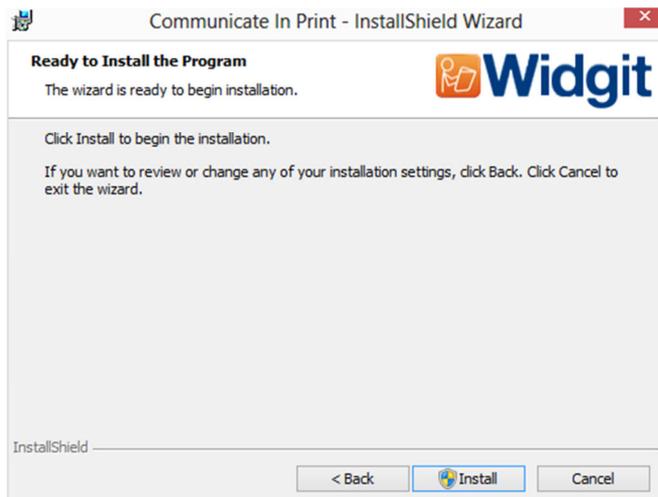

Complete Installations will install all program features locally on the machine to default locations. This type of installation is recommended for most users.

Custom installations are supported for the benefit of network administrators and for users who wish to specify non-standard locations for the shared Communicate: In Print files.

The majority of users will not need to perform a custom installation. If you wish to customise the installation further you may wish to download our network installation guide and perform an administrative installation.

Clicking '**Cancel**' will close the installation wizard.

After clicking to confirm the type of installation required click '**Next**'.

You are now ready to install.

Click **'Back'** to make any changes to your installation choices or **'Cancel'** to close the installation wizard'

Click **'Install'** to begin the installation.

It may take several minutes for all of the files to be installed.

Once Communicate: In Print has completed installing, click on the **'Finish'** button to exit.

Widgit Online training to help you make the most of your software.

Sign up to one of our online product training sessions presented by a member of our Technical Support team. If you are new to the software and would like to get to know it a little better these sessions are ideal.

We also provide several "Advanced" training sessions which aim to teach new or existing users how to create more advanced resources using the titles.
