Making a table - Helpful Hints V2.6 or older

Creating labels or flashcards to cut out

Make the Border Colour Transparent when adjusting Appearance

Note: Thicken Border Width to allow more space to cut between cells

Creating symbol only and word only flashcards

Create a table by starting with a non-symbol fixed frame

Go to Graphics Resources

Go to Use List

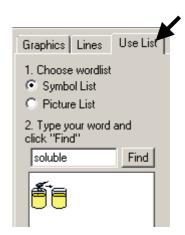

Search the **Symbol List** to find a symbol with the open wordlist Search the **Picture List** to find a **Widgit Picture** from the clipart bank

Click on the graphic you want Click on the cell you want to place it into

Repeat to fill half the cells

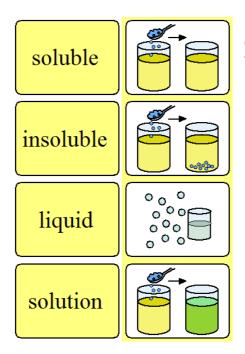

Leave the Graphics Resources

Enter text in the remaining cells

Format all the text in the cells at once by right clicking on the table before making changes to the Font, Size or Colour

Creating a game board

Go to **Graphics Resources**

Search Widgit Pictures for backgrounds.

Backgrounds can be found in:

Scenes

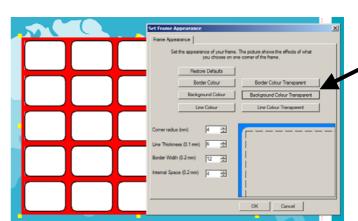

Environment

Underwater

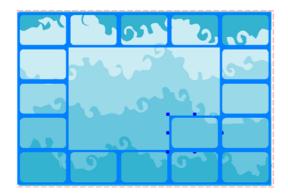

Click on the background and click on the page Click and then drag the scene to fill the page

Create a **table** on top of the background

Edit the **Appearance** by making the background transparent

Go to the **Graphics Resources** to fill the table

Use the **Scratch area** to place objects and **duplicate** to arrange multiple objects per cell

Group the table when finished

In **Adjust** mode use the **yellow handles** to stretch/shrink the table to fit on the background

Right click on the cells to edit the table to turn table into the desired same pattern
